PROJECTS

Bus Timing Management System

Developed a C++ and database-based system to manage bus schedules, routes, and passenger information. The system provides real-time bus timing information, departure and destination details, and allows administrators to update schedules efficiently.

WhatsApp Clone Mobile Application

Developing an Android-based messaging application using Java and Android Studio. The application focuses on real-time communication features, user authentication, and mobile-based chat functionality similar to modern messaging platforms.

Bantr – Student Communication Platform

Developing a student-focused social and communication platform designed to connect students. The application provides features like messaging, student interaction, and a community-based environment for academic communication.

StuDex – All-in-One Student Management Platform

Developing a complete student utility platform that combines essential academic and daily student needs. The system includes features inspired by Google Classroom such as online classes, course management, notes sharing, attendance tracking, assignment management, and student finance management. The goal is to create a centralized platform to improve student productivity and campus communication.

LANGUAGES

- **Bengali:** Native / Advanced (C1)
- **English:** Intermediate (B1)
- **Hindi:** Elementary (A2)
- **Urdu:** Beginner (A1)

HOBBIES & INTERESTS

I enjoy developing mobile applications, exploring new technologies, and improving my programming skills. In my free time, I like watching movies and series, gaming, travelling, and exploring new places. I also enjoy relaxing and spending time with friends.
